Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 16 July 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Specification

1. The amendment filed on 07/16/2007 is objected to under 35 U.S.C. 132(a) because it introduces new matter into the disclosure. 35 U.S.C. 132(a) states that no amendment shall introduce new matter into the disclosure of the invention. The added material, presented in claims 2, 3, and 6-14, which is not supported by the original disclosure is as follows: ***first communication means, second communication means, and third communication means***. Although the phrase ***separate communication means*** is present in several areas of the disclosure, that phrase has not been explicitly defined in the disclosure. Applicant is required to cancel the new matter in the reply to this Office Action.

Response to Amendment

2. This Office Action is in response to applicant's amendments filed on 7/16/2007. Applicant's arguments have overcome the previous rejections, and thus the previous rejections presented in the Final Office Action (mailed to applicant on 09/27/2007) are withdrawn. However, new rejections are applied below.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. **Claims 2, 3, 6-9, 11** are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains one, two, or all of the subject matter phrases: ***first communication means, second communication means, and third communication means***, which were not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim Rejections - 35 USC § 101

5. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

6. **Claim 8** is rejected under 35 U.S.C. 101 because of the limitation, ***"means for identifying a type of accessory when coupled to the camera body regardless of the system state of the camera body"***. It is obvious to one of ordinary skill in the art at the time the invention was made that a camera accessory can not be identified by the camera's microcontroller if the camera is powered off. Also, dependent **claims 6, 9, 11, and 13** are similarly rejected. **Claim 14** is similarly rejected because of the limitation ***"communication means for automatic detection of an attachment or removal of the accessory independent of the state of the camera body"***.

Allowance Subject Matter

7. **Claims 10 and 12** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
8. Regarding **claim 10**, the prior art of record neither shows nor suggests An accessory for a camera body, in which the separate output is changed to a low output state when the accessory has gone through its internal start-up routine.
9. Regarding **claim 12**, the prior art of record neither shows nor suggests a camera body, wherein the two system states include an off state and an on state.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art references are, made of record and not relied upon, are presented in the following paragraphs.
11. Myasaka et al. (U. S. PG Pub # 2004/0202464 A1) disclose an "Interchangeable Lens Type Camera System".
12. Uenaka et al. (U. S. PG Pub # 2002/0118972 A1) disclose a "Camera System Having a Communication System Between a Camera Body and a Photographing Lens".
13. Itoh et al. (U. S. Patent # 5,060,005) discloses a "Camera System".
14. Teramoto (U. S. PG Pub # 2002/0021898 A1) discloses a "Data Recording Device and Camera System".
15. Izukawa (U. S. Patent # 6,041,189) discloses a "Camera System, Camera and Camera Accessory".
